## Power of Innovation

Financial institutions continue to face the challenge of rigorous regulatory and compliance requirements while adapting to rapidly changing delivery channels, system requirements and enhanced industry standards such as Real Time Payments, SWIFT GPI, ISO20022, PSD2 and Open Banking. At the same time, regulatory reporting and compliance mandates are increasingly demanding faster and more granular information while pressure on cost and resources will ultimately result in further polarization of service providers ...unless drastic changes to legacy systems and processes are adopted. iSoftware4Banks (iS4B) is here to help meet these challenges with cost effective consultancy services and systems and application modernization and transformation solutions.

### Who is iSoftware4Banks?

iS4B is a top resource for specialized personnel and automation products. The company is dedicated to supplying innovative solutions, operational expertise and consulting resources. A solid understanding of banking, operations and extensive global experience with automation challenges, allow the iS4B team to supply effective and innovative solutions to help simplify operational processes including implementations of new systems, applications and procedures.

The company is comprised of career bankers and operations specialists—supporting automation initiatives around the world within banking operations, product and project management, compliance, accounting, and regulatory reporting.

*"Our team of industry proven professionals has the knowledge, experience and expertise to apply the 'Power of Innovation' to propel banking services and operations now and for the future."*

- Vincent Raniere, Chairman & CEO

iS4B enjoys long-term relationships with a wide range of financial institutions and vendors servicing the banking industry worldwide. To keep abreast of new developments, initiatives and business requirements in the everchanging financial services landscape, members of iS4B actively participate with several banking industry associations including BAFT (Bankers Association for Finance and Trade), US Faster Payments Council, NACHA, IIB (Institute of International Bankers), FIBA (Florida International Bankers Association) and others.

### Software Products

Through our strategic Partner Channel program with companies such as IBM, Fiorano, and Domo, iS4B provides unique business intelligence solutions and data visualization software tools emphasizing analytical data reporting views and perspectives.

### Consulting Services

Our services can be used by local, regional and global financial institutions allowing you to meet your individual needs and stay compliant with new industry initiatives and regulatory mandates.
